----- Nour Mokhtar(technologist) -----
----- Mohamed Hamza Allani(Time Keeper) -----

OBJECTIVE OF THE MEETING

To review the results of the entrepreneurship competition, discuss the outcomes following the team's participation, and define the next steps after being selected for the incubation program.

OPENING OF THE MEETING

- Presenter: Amina
- Brief introduction of the project team
- Overview of meeting goals

CONTEXT

After several weeks of preparation and pitching activities, the team successfully participated in the entrepreneurship competition and obtained the 1st Prize. As a result, the project was selected to benefit from an incubation program aimed at supporting the development and growth of the solution.

MEETING SUMMARY

- The team officially confirmed obtaining the 1st place award during the entrepreneurship competition.
- Positive feedback was received from the jury regarding:
 1. The innovative AI-driven approach
 2. The project's practical impact
 3. The integration of intelligent agents within the audit workflow
 4. The business potential and scalability of the solution
- The project was accepted into an incubation program, providing:
 - Mentorship opportunities
 - Business coaching
 - Networking with entrepreneurs and investors
 - Guidance for transforming the project into a scalable startup initiative

KEY DISCUSSION POINTS

- Importance of transitioning from academic prototype to a more production-oriented solution
- Need for stronger project organization and roadmap planning
- Identification of potential future collaborations and partnerships
- Discussion about preparing a more advanced demonstration version of the platform

DECISIONS

- Continue improving both technical and business aspects of the project
- Prepare a development roadmap aligned with incubation objectives
- Assign future workstreams related to product maturity, deployment, and market positioning

NEXT STEPS

- Attend incubation onboarding sessions
- Prepare technical documentation and project roadmap
- Improve system stability and scalability
- Define long-term business and deployment strategy
