OBJECTIVE OF THE MEETING

the main objectives of the meeting were to:

- Understand the overall framework for supporting companies in achieving ISO certification.
- Clarify ISO audit requirements, particularly ISO 9001.
- Identify project needs in terms of methodology, tools, and guidance.
- Discuss the development of a decision-support agent for the documentary audit component.
- Define expectations from the partner (guidance, supervision, validation).

OPENING OF THE MEETING

The meeting started with a brief presentation of our project to Madam Amira, including its objectives. This was followed by an introduction covering the role of supporting companies in preparing for ISO certification and audits, the importance of first complying with Tunisian laws and regulations, and the need to understand ISO standards and required audit documentation. It was also highlighted that ISO standards are continuously evolving, particularly with the integration of new technologies such as AI.

INFORMATION REQUESTED / QUESTIONS

PARTNER FEEDBACK / INSIGHTS

- ISO 9001 Approach: Process-based, requiring a process map with owners and co-owners.
- Process Types: Core (value-creating) and support (HR, IT, finance).
- Certification Steps: Pre-audit (readiness) and documentary audit (document review).
- Audit Components:
 - Documentary (policies, procedures, records, org chart)
 - On-site (real implementation check)
- Audit Method: Interviews + Process Identity Card (inputs, outputs, activities, risks).
- QMS: Based on personnel, resources, and documentation.
- Key Requirements: Quality policy, objectives, KPIs, risk control, staff competence, calibration.
- Analysis Tools: SWOT and stakeholder analysis.
- Improvement: PDCA cycle (Plan-Do-Check-Act), focusing on efficiency and effectiveness.
- Other Points: Change management, employee awareness, and compliance with external regulations are essential.
-
