

MEETING AGENDA

Meeting called by: – Rania Ben Traki – **Meeting type:** – discussion –

Date of meeting: 11/02/2026 9h15pm **Location:** ——— online ———

ATTENDEES

----- Nour Mokhtar (Devil advocate) -----
----- Maya Zahrouni (Moderator) -----
----- Mohamed Hamza Allani (speaker) -----
----- Rania Ben Traki (Note Keeper) -----
----- Omar Riahi (Technologist) -----
----- Amina Boujmil (Time keeper) -----
Ahmed Tira (Financial Derivatives & Crypto Financial Products Specialist)

AGENDA HIGHLIGHTS

Meeting Proceedings

1. Meeting Launch

The meeting was officially opened with a brief introduction and confirmation of audio connection. The team welcomed Mr. Ahmed and introduced the objective of the session: to gather professional insights to support their CBL-based AI project in the cryptocurrency domain.

2. Project Presentation and Objective Clarification

- **Team:** Presented the Advanced AI Project based on the Challenge-Based Learning (CBL) methodology.
- **Team:** Explained that the project aims to identify real-world problems in cryptocurrency and propose solutions using AI agents.
- **Mr. Ahmed:** Asked whether the focus was on user-side problems or platform-side challenges.
- **Team:** Confirmed that both perspectives were of interest.

3. Identification of Key Challenges

Platform-Side Challenges

- **Mr. Ahmed:** Highlighted that exchanges and crypto platforms mainly struggle with:
 - **User complaints and transaction disputes;**
 - **Fraud detection;**
 - **Retaining users;**

Identifying suspicious or high-risk accounts.

- **Mr. Ahmed:** Explained issues related to KYC verification, including:
 - Identity document falsification;
 - Face recognition mismatches;
 - Detection of fake or manipulated documents.
- **Mr. Ahmed:** Mentioned bot usage and behavioral analysis to determine whether trading activity is human or automated.

User-Side Challenges

- **Mr. Ahmed:** Stated that users primarily face risks related to scams rather than technical platform issues.

4. Fraud Types and Scam Mechanisms Discussed

- **Mr. Ahmed:** Described common scams, including:
 - Fake investment advertisements on social media;
 - Fraudulent Telegram groups;
 - Fake token sales before official listing;
 - False arbitrage opportunities promising guaranteed profit;
 - Phishing emails impersonating legitimate platforms;
 - Forged proof of payment and fake bank confirmations.
- **Team Discussion:** Explored how these fraud patterns could be detected using AI-based behavioral or transactional analysis.
- **Mr. Ahmed:** Explained blockchain traceability and how fraudsters use mixers to obscure transaction origins.
- **Mr. Ahmed:** Noted that specialized companies use AI to analyze transaction flows and detect suspicious fund movements.

5. Technical Clarifications

- **Team:** Asked about the difference between a coin and a token.
- **Mr. Ahmed:** Explained:
 - A coin has its own blockchain (e.g., TRX).
 - A token operates through a smart contract on an existing blockchain (e.g., USDT).
 - Transaction fees must be paid using the native coin of the blockchain.

6. Legal Context in Tunisia

- **Team:** Asked about the legal status of cryptocurrency in Tunisia.
- **Mr. Ahmed:** Confirmed that cryptocurrency is not officially legal and lacks a clear regulatory framework.
- **Mr. Ahmed:** Explained that transactions are commonly conducted via peer-to-peer (P2P) platforms using escrow systems.
- **Discussion:** Addressed uncertainty regarding tax reforms and their potential future impact.

Conclusion

The meeting enabled the team to:

- **Identify fraud detection as a primary AI application area.**
- **Recognize behavioral analysis and transaction tracing as key technical directions.**
- **Understand regulatory constraints affecting real-world implementation in Tunisia.**

The project was considered feasible within an academic framework as a prototype or proof of concept.

However, due to the current legal uncertainty surrounding cryptocurrency regulations in Tunisia, the team agreed to consider exploring an alternative project idea in order to avoid any potential legal or regulatory risks.

Closing

The meeting concluded with final questions and expressions of appreciation to Mr. Ahmed for his time and professional insights.
