

MEETING AGENDA

Meeting called by: — Nour Mokhtar — **Meeting type:** — online —

Date of meeting: — 19/02/2026 — **Location:** — online —

Meeting duration — 1h —

ATTENDEES
----- Maya zahrouni(Note Keeper) -----
----- Nour mokhtar(Moderator) -----
----- Rania Ben Traki(Speaker) -----
----- Mohamed Hamza Allani(Devil advocate) -----
----- Amina Boujmil(technologist) -----
----- Omar Riahi (Time Keeper) -----

OBJECTIVE OF THE MEETING

- Present our project to Mr. Karim
- Understand the full procedure of quality and social audits
- Identify requirements and constraints for designing the project workflow

OPENING OF THE MEETING

- Presenter: Amina
- Brief introduction of the project team
- Overview of project goals

INFORMATION REQUESTED / QUESTIONS

e asked multiple guiding questions to understand the full audit process, including the detailed steps of both the Quality Audit (Audit Qualité) and the Social Audit (Audit Sociale). We also sought clarity on how audits are conducted, the key checkpoints, evaluation criteria, and reporting expectations. The goal was to gather insights that would allow us to align our solution closely with real-world audit practices.

PARTNER FEEDBACK / INSIGHTS

Mr. Karim emphasized the strategic importance of RSE (Responsabilité Sociétale des Entreprises) for companies. He proposed that our project focus on RSE evaluation and recommended automating RSE diagnostics for client companies, supporting risk identification and assessment, and generating structured RSE reports that comply with company policies and best practices.

DECISIONS / ACTION POINTS

We decided that the project will focus on quality audits and ISO certification as the core workflow. The system will include dedicated modules for audit procedures, compliance verification, and reporting. The objective is to build a practical tool for companies and auditors, enabling standardized diagnostics and ISO compliance tracking. RSE evaluation and financial aspects will be considered as future extensions, but are not part of the current scope.
